1. telescopic bars
2. going-through bars
3. with levellers fully down
4. with levellers fully up

This state-of-the art luxurious football table, whose name is an introduction in itself, is meant for those who have a taste for style and refined objects and simply want the best.

Its sleek but sturdy (30mm thick high quality multi-layer plywood) cabinet in an elegant wenge coating is enhanced by the brushed aluminium and wooden finishings and features a complete absence of visible screws and plastic details, for the smoothest appearance.

The cone-shaped slanting legs (in HDP with silver lacquering) give the creation an aerial effect while the levellers allow for a perfectly flat playfield on uneven grounds. (fig.1)

The high quality Garlando bars (going-through or safety telescopic on choice), the steel roller bearings to greatly improve the

game speed and the high grade Garlando playfield (laminated, transparent or sanded glass) will grant a professional playability. (fig.2).

Unbreakable players in plastic material, colours: grey and brown, with fully rotating or not fully rotating goalkeeper, on choice. (fig.3)

Professional plastic handles in silver color with solid wenge wood inserts for an outstanding look and a feeling of great comfort. (fig.4)

Inside goals coated with felt to reduce noise and prevent ball chipping and bouncing off.

Ball rescuing from an exit on the table side, with brushed aluminium finishings.

10 white balls supplied as standard.
