

## Special

These babyfoot tables are versions of our B60 and B90 models with different styles and decorations. They offer the same high quality and the same feel, but are designed for different settings or a different player experience.

The cabinet is made of premium solid and laminated beechwood. The carpentry joints are reinforced with steel hardware so they can stand up to anything. The game's mechanical and moving parts are made from hi-tech materials for better play.

## Wheelchair-accessible (straight legs)

The 1st wheelchair-accessible model for people with disabilities created by Bonzini (1985). With this accessible foosball table, wheelchair users can play on professional-grade equipment and share the fun of foosball with everyone. Balls are returned directly to the player. It features the same quality and feel as the B90 Original and can be personalized like all of our tables. It is installed in residential centres for people with disabilities, organisations' spaces and private homes.
