

Description

Home or away:

The only thing that counts is your input. Our professional equipment at the 2nd competition table ensures that you perform at the top of your game. With usual reliability and plenty of new features. Now the single-piece table makes the game even faster and gives a more intensive game experience.

See-through.

The new see-through goal gives enhanced visibility. As you would expect – this is a standard feature for all leo_pro-tables. With optional metal platform for challenging ball placing. Top-class equipment. All leo_professionals are fitted with the best rods, smooth-running bearing and innovative rubber bumpers with integrated pads.

Keep the goal under control.

Total ball control is possible even in the goal mouth. Now the goalkeeper can also reach backwards – and keep up with all those lucky goals!

Proven and reliable.

The electronic coin counter gives extra security. No need to worry about counterfeit money! Other coin counter models are also available alternatively.
