

OLYMPIC

Available in two different colour options: briar wood effect/black and red/black.

1 Cabinet in high quality plastic laminate plywood (thickness 30 mm).

2 Hardwood slanting feet - coated in washable paint - for better stability.

3 Cold drawn steel (25 NC 6) rods (diameter 16 x 2.3mm) with high stress resistance (R = 100 Kg x mm²) and 15 micron thickness chromium plating. One-colour (red-blue) standard players moulded to the bars (on request three-colour selflocking players in red-black-pink and blue-black-pink). Telescopic rods for greater safety also available.

4 Nylon bushes with steel ball bearings for high speed action, smoother play and reduced wear and maintenance.

5 Playfield in choice of 5mm non-reflective, tempered glass or plastic laminate on a chipboard base. Detachable from upper cabinet by means of two locks to enable lowering for internal cleaning and inspection.

6 Holders for glasses, bottles or cans at each end.

7 The table is covered using tempered anti-break glass. This reduces noise, keeps playing area clean and prevents tampering and theft of balls. Recommended where play cannot be supervised.

8 A kit with 4 ashtrays and an anti-theft metal cable is available on request.

9 On request, playfield Led-bar lighting system, complying with EU regulations on the Electromagnetic Compatibility and Safety (Low Voltage).

10 Standard mechanical coin mechanism set for any kind of coin or token. Options: a) mechanical coin mechanism with coin rejector; b) electro-mechanical coin mechanism with motorised ball release system; c) electronic coin mechanism with motorised ball release system. For further information please see page 38 and following.

11 10 white "Standard" balls supplied with the table.
