

Image

Below a sophisticated surface this mirror-like football table hides a sturdy construction obtained by originally juxtaposing different materials like wood, metal and reflective surfaces.

Make your home an exclusive place by furnishing your living room or your playroom with a design object which perfectly blends with any surrounding decor.

Heavy duty 25mm thick MDF cabinet with melamine coating. Unbreakable mirror-like surface with silver edges.

Elegant HDP (High Density Polymer) legs strengthened with fibreglass, inclined for an increased stability on the ground. Levellers enable a perfectly flat playing field on uneven floors (fig.1)

2,2 mm thick high stress resistance steel bars coated with anti-rust chromium-plating. On request telescopic safety bars to ensure the greatest safety (fig.2).

Steel roller bearings to greatly improve the game speed, while reducing the stress for the players' wrists. Bearing retainers in silver colour.

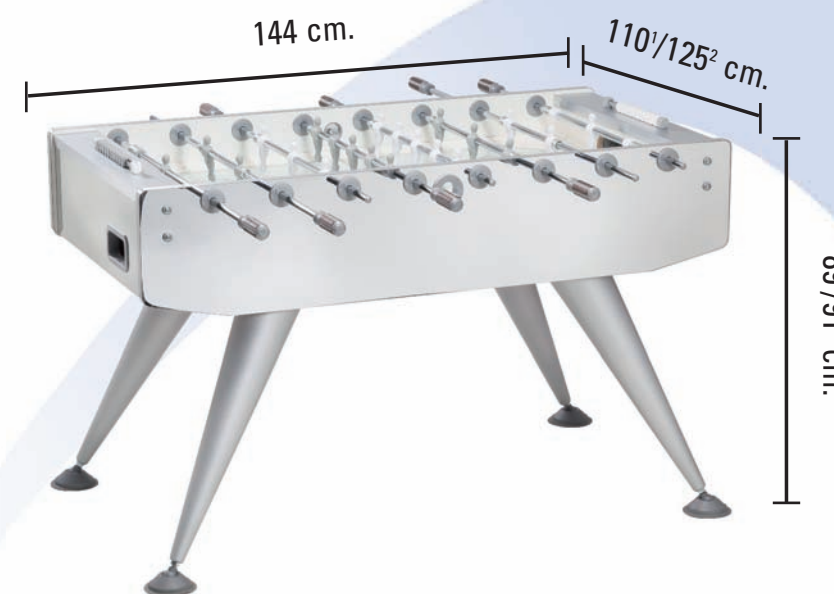

Grey and white players in unbreakable plastic moulded onto the bars (fig.3).

Fully rotating (360 degrees) or non-rotating goalkeeper (180 degrees) on choice (fig.3). Tempered glass playfield with white background and grey lines.

Plastic handles with wenge wooden inserts for a better grip (fig.4).

Quick and easy ball recovery through an exit behind each goal (fig.5).

10 orange Standard balls supplied.

- 1. telescopic bars
- 2. going-through bars
- 3. minimum height
- 4. maximum height
