

Tournament

Tournament has the look of the World Champion but a non-rotating goalkeeper. It is produced in a standard version and in a FICB authorized version for Italian competitions only.

1 Very sturdy as well as flexible construction 3cm (1+1/4in) thick, made from layers of plywood and medium density fibreboard combined together. Black laminate and aluminium coating.

2 9 x 9cm (4x4in) metal legs coated with long-lasting silver painting. New type heavy duty leg levellers for a perfectly flat playfield on all surfaces.

4 High stress resistance machine-trueed hollow steel bars - diameter 16mm - coated with anti-rust chromium-plating. One-colour players in plastic material (moplen), moulded onto the bars: they maintain their positions perfectly. Non-rotating goalkeeper (180°) available only. Team colours: red and blue.

5 Telescopic rods available on request.

6 Ball bearings with steel roller bearings greatly improve the game speed, while reducing the stress for the players' wrists.

7 Handles in a new plastic material with wood inserts to prevent any slipping on the rods.

8 Playing field with tempered antireflex glass.

9 New design playfield corners: they slope down towards the playfield without creating "steps".

10 Inside goal net coated in felt, to reduce noise and prevent ball chipping.

11 Goal profiles with aluminium and zinc alloy coating for long duration.

12 The cabinet can be opened to reach the inside. The upper cabinet can be lifted thanks to a metal support bracket activating automatically when the cabinet upper part is lifted.

13 Detachable playing field: two locks enable to detach the playing field from the cabinet upper part for easy cleaning and parts replacing.

14 Standard mechanical coin mechanism. On request electromechanical coin mechanism or electronic system GARL 2001. For further information please see page 38 and following.

15 10 white "Standard" balls supplied.
