

# Description

## **Back to the natural look**

The Design-Table Yacht represents a homage to artisanship.

For this solid wooden table, we decided to use a very special material: the Yacht comprises almost entirely of oak.

There is no other wood material more representative of the kicker table manufactory Leonhart.

The striking leg design in a distinctive Y-shape indicates its stability. The solid body of this table reflects the robustness of an old oak tree.

## **Unique**

Each Yacht is fabricated in Bavaria by a master carpenter and is truly unique. The goal counters are cut, polished and stained by hand. The dust was blown off an antique turning machine especially for creation of the handles.

The exceptionally high quality of the processing is therefore guaranteed.

## **A high-quality game**

During the development of the table, playability remained the primary focus.

The playing surface, figures and rods are identical to those of the tournament tables, and thus permit a unique playing experience.

“There aren’t many tables which are of such high quality and yet on which you can play so well. With the Yacht, Leonhart has proven that both these things are possible”.

*Semin Mensah, DTFB (German Table Soccer Federation) German Champion 2018*

Further information:

- Solid oak
- Top-heavy figures
- Tournament rods
- Goalposts: Classic soccer goalposts
- Balls included
- Lubricant included
